

# HARDWAX OIL MAINTENANCE INSTRUCTIONS

SmithMade's Hardwax Oil must be maintained differently than traditional finishes. SmithMade's Premium Soap removes dirt and grease, while keeping the luster of the matt oil finish. For weekly/bi-weekly cleaning start by thoroughly vacuuming or sweeping the floor. SmithMade Soap is a concentrate, mix 3 Ounces of soap into 2.5 gallons of water. In a separate bucket add clean water to rinse the mop head. Clean the surface with a Premium Microfiber Mop, rinsing with clean water between cleaning. Be certain not to use excessive water or leave puddles behind. **EXCESS WATER WILL DAMAGE THE FLOORING.** A damp cleaning is sufficient. Allow to dry for 20 minutes before continuing regular use.

For annual maintenance, contact your hardwood flooring professional to apply a coat of SmithMade Maintenance Oil. This will rejuvenate your surface oil and keep your floor looking new.
